

CTC, Inc. accommodates growth and expansion with new office space
Camp Bowie West relocation provides Fort Worth rail communications,
signaling and safety firm with room to grow

Fort Worth, Texas (Sept. 8, 2015) – CTC, Inc. (CTC), a rail communications and signaling engineering firm, moved into its new corporate headquarters on Sept. 4, 2015. The new office, located at 9601 Camp Bowie West, Fort Worth, TX 76116, is approximately nine miles from its previous location at the corner of Texas State Highway 183 and Bryant Irvin Road.

“As our innovative rail products and signal system solutions have become better known in the industry, the demand for our services has risen exponentially,” said CTC’s Chief Operating Officer Mike Cunningham. “Our new location and enhanced operational efficiencies will help us continue to evolve and keep pace with changes in the rail industry as well as our client’s needs.”

For CTC, the new location means additional space to accommodate personnel growth and the demand for the firm’s services. At 12,000 square feet of office and warehouse space, CTC now features an onsite wiring and electrical shop, an engineering lab and a more efficient layout for its employees. The close location to the interstate (I-820) also provides easy access for employees and visitors.

All of CTC’s phone numbers and fax numbers will remain the same.

About CTC

CTC, Inc., provides communication and signaling systems, products and services for the rail industry, specializing in highway-rail grade crossings that are interconnected with traffic signals. The company has delivered signal engineering and solutions for some of North America’s most complex highway–rail grade crossing intersections. In addition to preemption design, review and remediation, CTC also offers rail signal engineering and design, turnkey signal construction, quiet-zone implementation, forensic reconstruction of signal system operations and patented signal products for grade crossings interconnected with highway traffic signals.
