

ANOTHER TRAIN COMING

PEDESTRIAN ACTIVE WARNING SIGN

CTC's Pedestrian Warning Devices improve pedestrian safety on or near highway-rail grade crossings. The Pedestrian Active Warning Sign uses cutting edge technology to determine multiple train approaches at busy or complex grade crossings with pedestrian traffic.

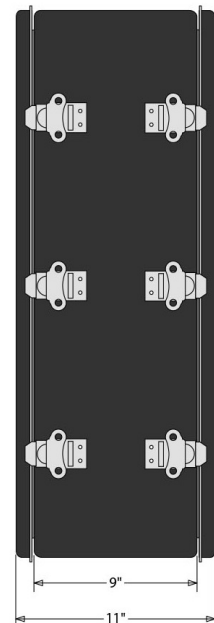

Flashing lights interrupt pedestrian attention and an enunciated audible message reinforces train approach. Pedestrian warning devices are MUTCD compliant.

FEATURES

- ✓ Single train activates illuminated crossbuck while red lights flash alternately
- ✓ Second train activates audible message while alternatively flashing "ANOTHER TRAIN COMING" and "DANGER"
- ✓ Provides verification circuit for audio signals
- ✓ Tamper and vandal resistant
- ✓ Interconnects to railroad bungalow
- ✓ Supports up to six (6) railroad tracks
- ✓ Programmable audio message

SIDE VIEW

BENEFITS

Enhances pedestrian safety by providing additional warning at grade crossings with multiple tracks

Improves safety by providing both visual and audio messaging to direct pedestrian attention to trains that may or may not be visible

TECHNICAL SPECIFICATIONS

Power

- 12 V dc (nominal)

Mounting

- Pole

Cabinet

- NEMA 4X rated
- 1/8 in. wall T5052 aluminum cabinet with continuously welded seams
- Black
- 1/4 in. impact-resistant polycarbonate face

Door

- Continuous hinge
- Stainless steel, tool-free door latches

Options

- Single face message display
- Double faced message display
- Multiple audio languages available

Physical

- Length - 30 in (762 mm)
- Height - 30 in (762 mm)
- Depth - 8 in (203 mm)
